

Sustainability at Spahats Creek Resorts

At Spahats Creek Resorts, sustainability is at the core of everything we do. Our commitment to the environment shapes our operations, influences our relationships with local communities, and guides our overall mission to preserve the natural beauty surrounding us.

Commitment to Carbon Neutrality

We aim to reach carbon neutrality by 2030. Our strategy includes transitioning to renewable energy sources such as solar, wind power, and hydropower across our resort location.

Regenerative Practices

We utilize regenerative practices in managing our landscapes and gardens to enhance soil health, conserve water, and increase biodiversity. This approach helps us repair and enrich the local ecosystem, ensuring that our activities contribute positively to the environment.

Waste Reduction and Recycling

Our waste management strategy focuses on reducing waste generation, enhancing recycling efforts, and encouraging the reuse of materials. We conduct waste audits to identify key areas for improvement and implement programs that promote waste segregation and recycling among guests and staff.

Sustainable Sourcing

Our procurement policy prioritizes products and services that are eco-friendly, sustainable, or made from recycled materials. We work closely with suppliers to ensure that our operations support sustainable practices throughout the supply chain.

Community and Culture

We actively participate in and support local environmental and social initiatives. By investing in the community and promoting sustainable practices, we strive to create a positive impact beyond our immediate surroundings.

Continuous Improvement

Recognizing that sustainability is an evolving target, we are committed to continuous improvement. We regularly review our practices, set progressive goals, and adopt innovative solutions to enhance our sustainability. We believe in transparency and openly share our challenges and successes to encourage a broader commitment to environmental stewardship.

Spahats Creek Resorts is dedicated to not only minimizing its environmental impact but also serving as a leader in sustainable tourism, inspiring both the industry and our guests to join us in protecting our planet for future generations.
